Experience/ Projects

CalcuBecasUCR

2022

This a tool **used by hundreds of students everyday,** make to calculate amount of money on scholarships by the Universidad de Costa Rica.

Gym management software

2022

This is software to create and keep track of users memberships, as well as access control functionalities through providing and scanning QR codes.

Food times control

2022

This is a software to control how many times a person have had food in big events that I built for my family company. You can check out the open source version that I published as demo!

Education

Universidad de Costa Rica, San José

2020 - present

I am currently an advanced student of **Pure Mathematics** at the Universidad de Costa Rica, interested in breaking into a tech career soon.

You can check out other projects at my github and my portfolio website.

Skills

HTML, CSS, Typescript
